

From this site (startbootstrap.com) I downloaded all of my templates. This is the following template, in which I used for my About.html, I changed the color, font, and removed the bottom part.

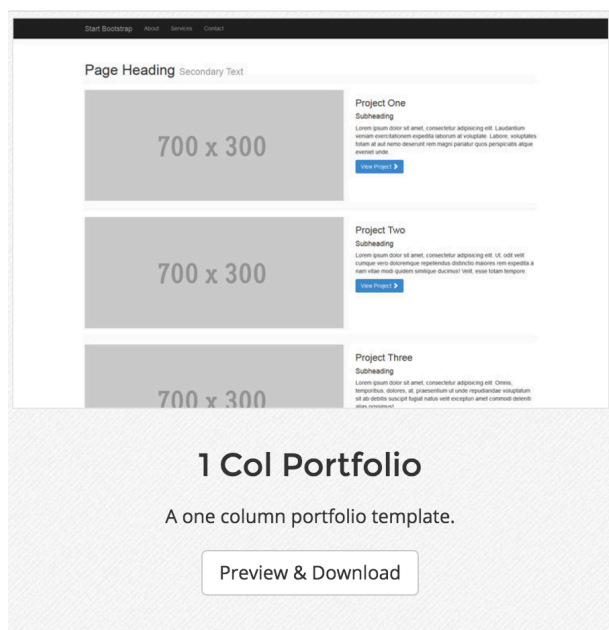

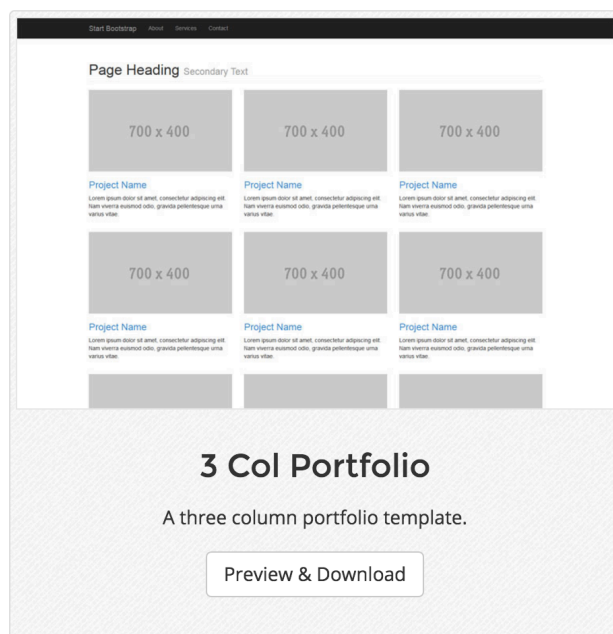

<http://startbootstrap.com/template-overviews/portfolio-item/>

I downloaded this 3 col layout for my photography.html, I changed the colors and wording. I then added this other page to each photo, for my photo.htmls and removed all the rows to just leave one for each.

<http://startbootstrap.com/template-overviews/1-col-portfolio/>

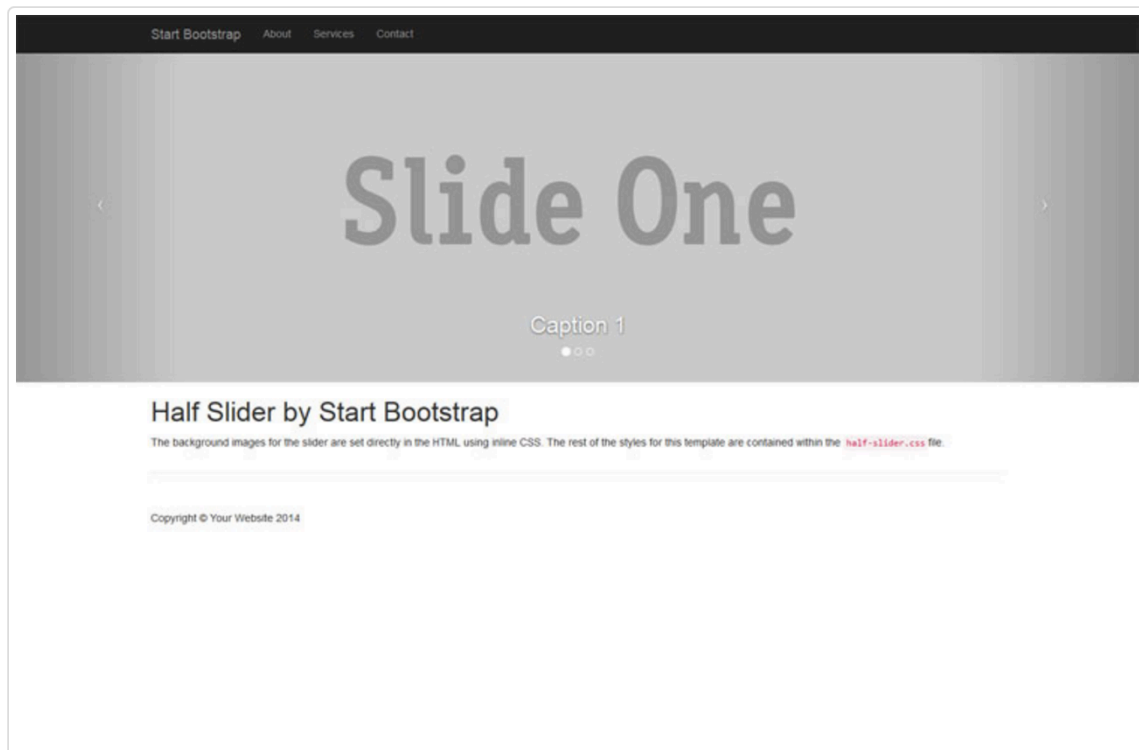

I used this template for my contact.html, in which I added my own wording, got rid of the slider, and made my own form.

For my home page I used this template, I changed the colors, background pictures, and style of the shadowing buttons.
